Leons C Andriod Developer

Highly skilled Java Developer with extensive experience in backend development using Spring Boot and Android development. Proficient in full-stack web development with Node.js and React, and has a solid understanding of AWS services and log management using the ELK stack. Proven track record as an Engineering Manager, leading teams and driving successful project outcomes.

Educational Qualification:

- Master of Technology – Kalasalingam University, Tamil Nadu (March 2013)

Technical Skills

Languages: Java, Kotlin, Python, JavaScript (Node.js)

Frameworks: Spring Boot, React

Mobile Development: Android Development Cloud Services: AWS (Lambda, ECS, WorkMail)

Tools: OpenCV, ELK Stack (Elasticsearch, Logstash, Kibana)

Expertise

Mobile Applications: Experienced in Android app development using Java and Kotlin, delivering high-quality mobile projects.

Backend Development: Strong experience in building robust Java backends using Spring Boot, focusing on scalability and performance.

Full-Stack Development: Proficient in full-stack web development, leveraging Node.js for backend services and React for frontend development.

Cloud Solutions: Hands-on experience with AWS services, including Lambda functions and WorkMail, and exposure to AWS ECS for container management.

Log Management: Implemented the ELK stack for effective log segregation and monitoring, enhancing application debugging and performance insights.

Work Experience:

Lead Software Development Engineer (December 2016 – Present):

- Developed scalable Java backend solutions using Spring Boot, delivering high-quality projects.
- Led Android development efforts using Java and Kotlin, successfully completing multiple projects.
- Expanded into full-stack web development, utilizing Node.js for backend and React for frontend development.
- Implemented a face detection program using OpenCV in Python for Raspberry Pi applications.
- Managed teams and leveraged AWS services, successfully integrating Lambda functions and WorkMail, while gaining exposure to AWS ECS.
- Utilized the ELK stack for efficient log management and segregation, improving system monitoring and troubleshooting.

Software Developer (January 2014 – December 2016):

- Contributed to software development projects with a focus on Java and programming fundamentals.
 - Collaborated with teams to build innovative applications and enhance software development processes.
 - Demonstrated eagerness to learn and adapt, quickly grasping new concepts and technologies.
-
