Hire premium, dedicated virtual developers. Build your own edev Team

Rodrigo
Full Stack Developer

Experienced Full Stack Developer with a strong background in backend development using NodeJS, Express, and AWS, along with proficiency in MongoDB and MySQL. Proven ability to design, implement, and optimize web applications. Demonstrates a solid understanding of process management and database administration. Skilled in troubleshooting and supporting networking issues with hands-on experience in Cisco and Juniper routers.

Educational Qualification:

- Full Stack Web Developer – Digital House Coding School (July 2020)
- Software Engineer – Universidad Abierta Interamericana (April 2015 – Dec 2019) | Graduated with an average grade of 8

Technical Skills

Languages: JavaScript, NodeJS

Frameworks: Express, Sails.js

Databases: MongoDB, MySQL, SQL Server

Cloud Platforms: AWS

Version Control & CI/CD: GitHub, GitHub Actions, Jenkins

Operating Systems: Linux

Development Tools: Npm

Other Skills: UML, Scrum

Expertise

Full Stack Development: Strong proficiency in full stack development, with experience in developing internal web pages, backend services, and API management.

Backend Engineering: Expertise in designing, developing, and maintaining backend services using NodeJS, MongoDB, and MySQL, focusing on performance optimization and scalability.

Cloud Integration: Hands-on experience with AWS services and Jenkins for deployment and cloud-based solutions.

Database Management: Experience in managing databases with SQL Server and MongoDB, ensuring data consistency and reliability across applications.

Troubleshooting & Support: Extensive background in troubleshooting network issues, providing support for Cisco and Juniper routers, and managing VM configurations and upgrades.

Work Experience:

Backend Developer (Nov 2021 – Present), Endava:
- Developing backend solutions using NodeJS, Express, and AWS.
- Managing MongoDB databases and handling deployments via Jenkins.

Software Developer (May 2021 – Nov 2021), WarnerMedia:
- Developed internal web applications, utilizing NodeJS, GitHub, and MongoDB.
- Automated processes using GitHub Actions for continuous integration.

Software Developer (Jan 2021 – May 2021), Eudaimonia Software Factory:
- Developed and fixed functionalities across various projects using NodeJS, Sails.js, MongoDB, and MySQL.

Implementation Analyst (Feb 2020 – Jan 2021), Telecom Argentina:
- Implemented technical solutions on the Flow platform, including upgrades and VM configuration.

Process Analyst (April 2019 – Feb 2020), Telecom Argentina:
- Led process analysis and implementation, working with SQL Server databases.

NOC Help Desk and Dispatch Operator (Oct 2016 – Apr 2019), Telecom Argentina:
- Provided network troubleshooting and support, working with Cisco and Juniper routers.
